Youths are the future of a nation for an emerging country like India, development of underprivileged youths is the key for the nation and their education is the cornerstone of this progress. Education is one of the main agents of change. Computer knowledge is a must as it is the need of an hour. We depend on the computers to help us complete tasks and to solve problems. Computers are used in numerous fields like business, pharmacy, music, education, engineering, transportation etc. as they help to ease any tasks, and speed up the work. It is of utmost importance that every individual should be a computer literate.

Keeping these important factors in mind, ADMEC has launched few [Certificate Courses](#) [1] for **Underprivileged candidates only free Job Oriented Computer Training**. Our institute is registered and approved from the relevant State and Central Government bodies and is an ISO Certified 9001:2015 for quality and management.

We are dedicated to bring a change in India by focusing on deprived and less fortunate people. It can be done by educating children with the belief that computer education is a pre-requisite for socio-economic change. ADMEC, along with its education partners are working towards the goal to make sure that underprivileged children can avail **free computer training** in the field of Web Design, Graphic Design, Video Editing, and CAD which can help them making a successful career.

Eligibility Criteria for Free Job Oriented Computer Courses
