Animation Master

Pre Production | Production | Post Production

18
Months

"Animation" is a form of "animate", which means to bring to life. Thus when a multimedia developer brings an image to life with the help of animation.

Animation is one of the latest and most advance technologies of the computer applications, it is not only useful in the scientific world but animations have also slowly taken over the entertainment and the other daily aspects of life.

Usage of Animation:

- Commercials
- Cartoon Movies
- E-learning
- Films
- Games
- Web Applications

Future of Animation

The animation sector in India is growing at rapid pace. Many global companies like Disney, Warner Brothers, Sony etc. are outsourcing work to Indian Companies. New tools and programs are created every year to enhance the overall animation process. The field has expanded from television and movies into mobile devices, games, and software applications.

Career Prospects

India has about 300 Animation, 40VFX and 35 Game Development Studios. As per CII India Design Report "Animation and VFX Industry is estimated to grow to Rs. 95.5 Billion in 2019 at CAGR of 16.3%".

Career Scope and Opportunities

In today's world, one of the major challenges which the animation industry is facing nowadays is the main gap between the supply and demand of talented and skills professionals, therefore we can say that there is huge demand for skilled professionals in this field.
